Supported
Employment

“To support”
means to
provide a
foundation;
to give aid
or
encouragement.

Avita Community Partners IPS Supported Employment Program (Individual Placement and Support)

What is Supported Employment?

Avita's Supported Employment Program helps clients find, get, and maintain employment. The Program helps clients find job opportunities that are competitive (pays at least minimum wage) and are based on individuals' abilities, strengths, experiences, and preferences.

What are the benefits of working?

For many people, work is part of their identity. When people have a job, they often see themselves in a more positive way. Work provides daily structure and routine. Work contributes to a person's overall health, well-being, and overall quality of life. Job earnings give people more choices about what to buy, where to live, and provides opportunity to build savings for future needs.

What are the services provided by the Program?

Individualized job search & placement

The Program helps clients find a job that matches their interests and abilities and then provide for clients the support they need to succeed in their jobs. Support is provided for as long as needed or desired.

Benefits counseling

Helping you to understand how benefits (such as Social Security or Medicaid) are affected by job earnings. Most people are able to work and continue to receive some benefits.

Timely job search & placement

We can begin assisting you with job search and placement soon after you are enrolled in the Supported Employment Program.

Individualized, ongoing job supports

Examples of individualized supports are meetings with as needed to talk about your job, communication with your employer as needed for feedback and problem solving, help with transportation issues, assistance with work attire, and other needs. Supported Employment Specialists provides job support until your job performance situation is stable and support is no longer needed or desired.
